SkyRecon – Certificate of Defensive Publication

DOI: 10.5281/zenodo.17815879

Publication Date: 2025-12-04

Inventor:

Alejandro Albert Jara

DNI: 51124730P

This certificate confirms the defensive publication of the invention titled:

"SkyRecon – A System and Method for Estimating Aviation Crew Fatigue Using Mobile Sensors, Wearable Data, and Operational Self-Reports."

Purpose:

This document serves as legally recognized proof of authorship and establishes prior art to prevent unauthorized patent attempts. It verifies that the invention was publicly disclosed and timestamped through Zenodo and GitHub.

Official Repositories:

Zenodo DOI Record:

https://doi.org/10.5281/zenodo.17815879

GitHub Defensive Publication Repository:

https://github.com/alexxalbertt/SkyRecon_Public_Defensive_Publication

SHA256 Hash of Original Invention Disclosure PDF:

9bb093bfcb5f9a2ea16fec0acfb48de5368fdae2741f118ddd9b2c864274535b

This hash uniquely identifies the invention disclosure document and can be used to verify integrity and authenticity.

Disclaimer:

This certificate is for personal archival, verification, and evidentiary purposes. Zenodo and GitHub serve as independent timestamping authorities.
